WordPress 4.5 “Coleman”

<https://wordpress.org/news/2016/04/coleman/>

The screenshot shows a Mac OS X browser window displaying the WordPress.org news article for WordPress 4.5 "Coleman". The title "WordPress 4.5 ‘Coleman’" is prominently displayed at the top. Below it, the URL "https://wordpress.org/news/2016/04/coleman/" is shown in the address bar. The main content features a large image of Coleman Hawkins playing a saxophone, with the text "Introducing WordPress 4.5 ‘Coleman’" above it. The WordPress.org header includes the logo, navigation links (Showcase, Themes, Plugins, Mobile, Support, Get Involved, About, Blog, Hosting), and a "Download WordPress" button. To the right, there's a "See Also:" section with links to the WordPress Planet and a development blog, and a "Categories" section listing various news categories.

WordPress 4.5 “Coleman”

Posted April 12, 2016 by Mike Schroder. Filed under [Releases](#).

Version 4.5 of WordPress, named “Coleman” in honor of jazz saxophonist Coleman Hawkins, is available for download or update in your WordPress dashboard. New features in 4.5 help streamline your workflow, whether you’re writing or building your site.

contenteditable

https://developer.mozilla.org/en-US/docs/Web/HTML/Global_attributes/contenteditable

A screenshot of a web browser displaying the MDN Web Docs page for the `contenteditable` attribute. The browser window has a title bar showing "contenteditable - HTML | M" and a user name "Pawel Grzybek". The address bar shows the URL "https://developer.mozilla.org/en-US/docs/Web/HTML/Global_attributes/contenteditable". A message at the top of the page states: "Account creation on MDN is disabled while we upgrade our moderation mechanisms. If you see something that needs to be fixed, please file a bug: <https://bugzilla.mozilla.org/form.doc> and we'll handle it as soon as we can. Thanks for your patience!" The MDN logo is in the top left, and the Mozilla logo is in the top right. The navigation menu includes links for "WEB PLATFORM", "MOZILLA DOCS", "DEVELOPER TOOLS", and "FEEDBACK". Below the menu, the breadcrumb navigation shows "MDN > Web technology for developers > HTML > Global attributes > contenteditable". On the right side, there are buttons for "LANGUAGES", "EDIT", and a gear icon. The main content area has a large heading "contenteditable" with navigation arrows. To the left is a "SEE ALSO" sidebar with sections for "HTML", "Tutorials", "References", and "Global attributes". The main content area contains a yellow-highlighted section about the attribute's purpose and values, followed by a bulleted list of allowed values.

The `contenteditable` [global attribute](#) is an enumerated attribute indicating if the element should be editable by the user. If so, the browser modifies its widget to allow editing. The attribute must take one of the following values:

- `true` or the *empty string*, which indicates that the element must be editable;
- `false`, which indicates that the element must not be editable.

Stylelint

<https://css-tricks.com/stylelint/>

The screenshot shows a Mac OS X desktop with a browser window open to the URL <https://css-tricks.com/stylelint/>. The browser's title bar reads "Stylelint | CSS-Tricks". The page itself has a dark header with the "CSS-TRICKS" logo and navigation links for Blog, Videos, Almanac, Snippets, Forums, Shop, Lodge, and Jobs. A search bar contains the placeholder "e.g. flexbox". The main content area features a large, bold title "Stylelint" and a "GUEST AUTHOR // APRIL 20, 2016" badge. Below the title, there is a paragraph of text about Stylelint. To the right, a sidebar titled ">_ job board" lists several hiring opportunities:

- POPSUGAR** is hiring a Frontend Lead Developer
- Rooster Grin** is hiring a Front End Developer
- Clover Park Technical College** is hiring a Web Content Manager

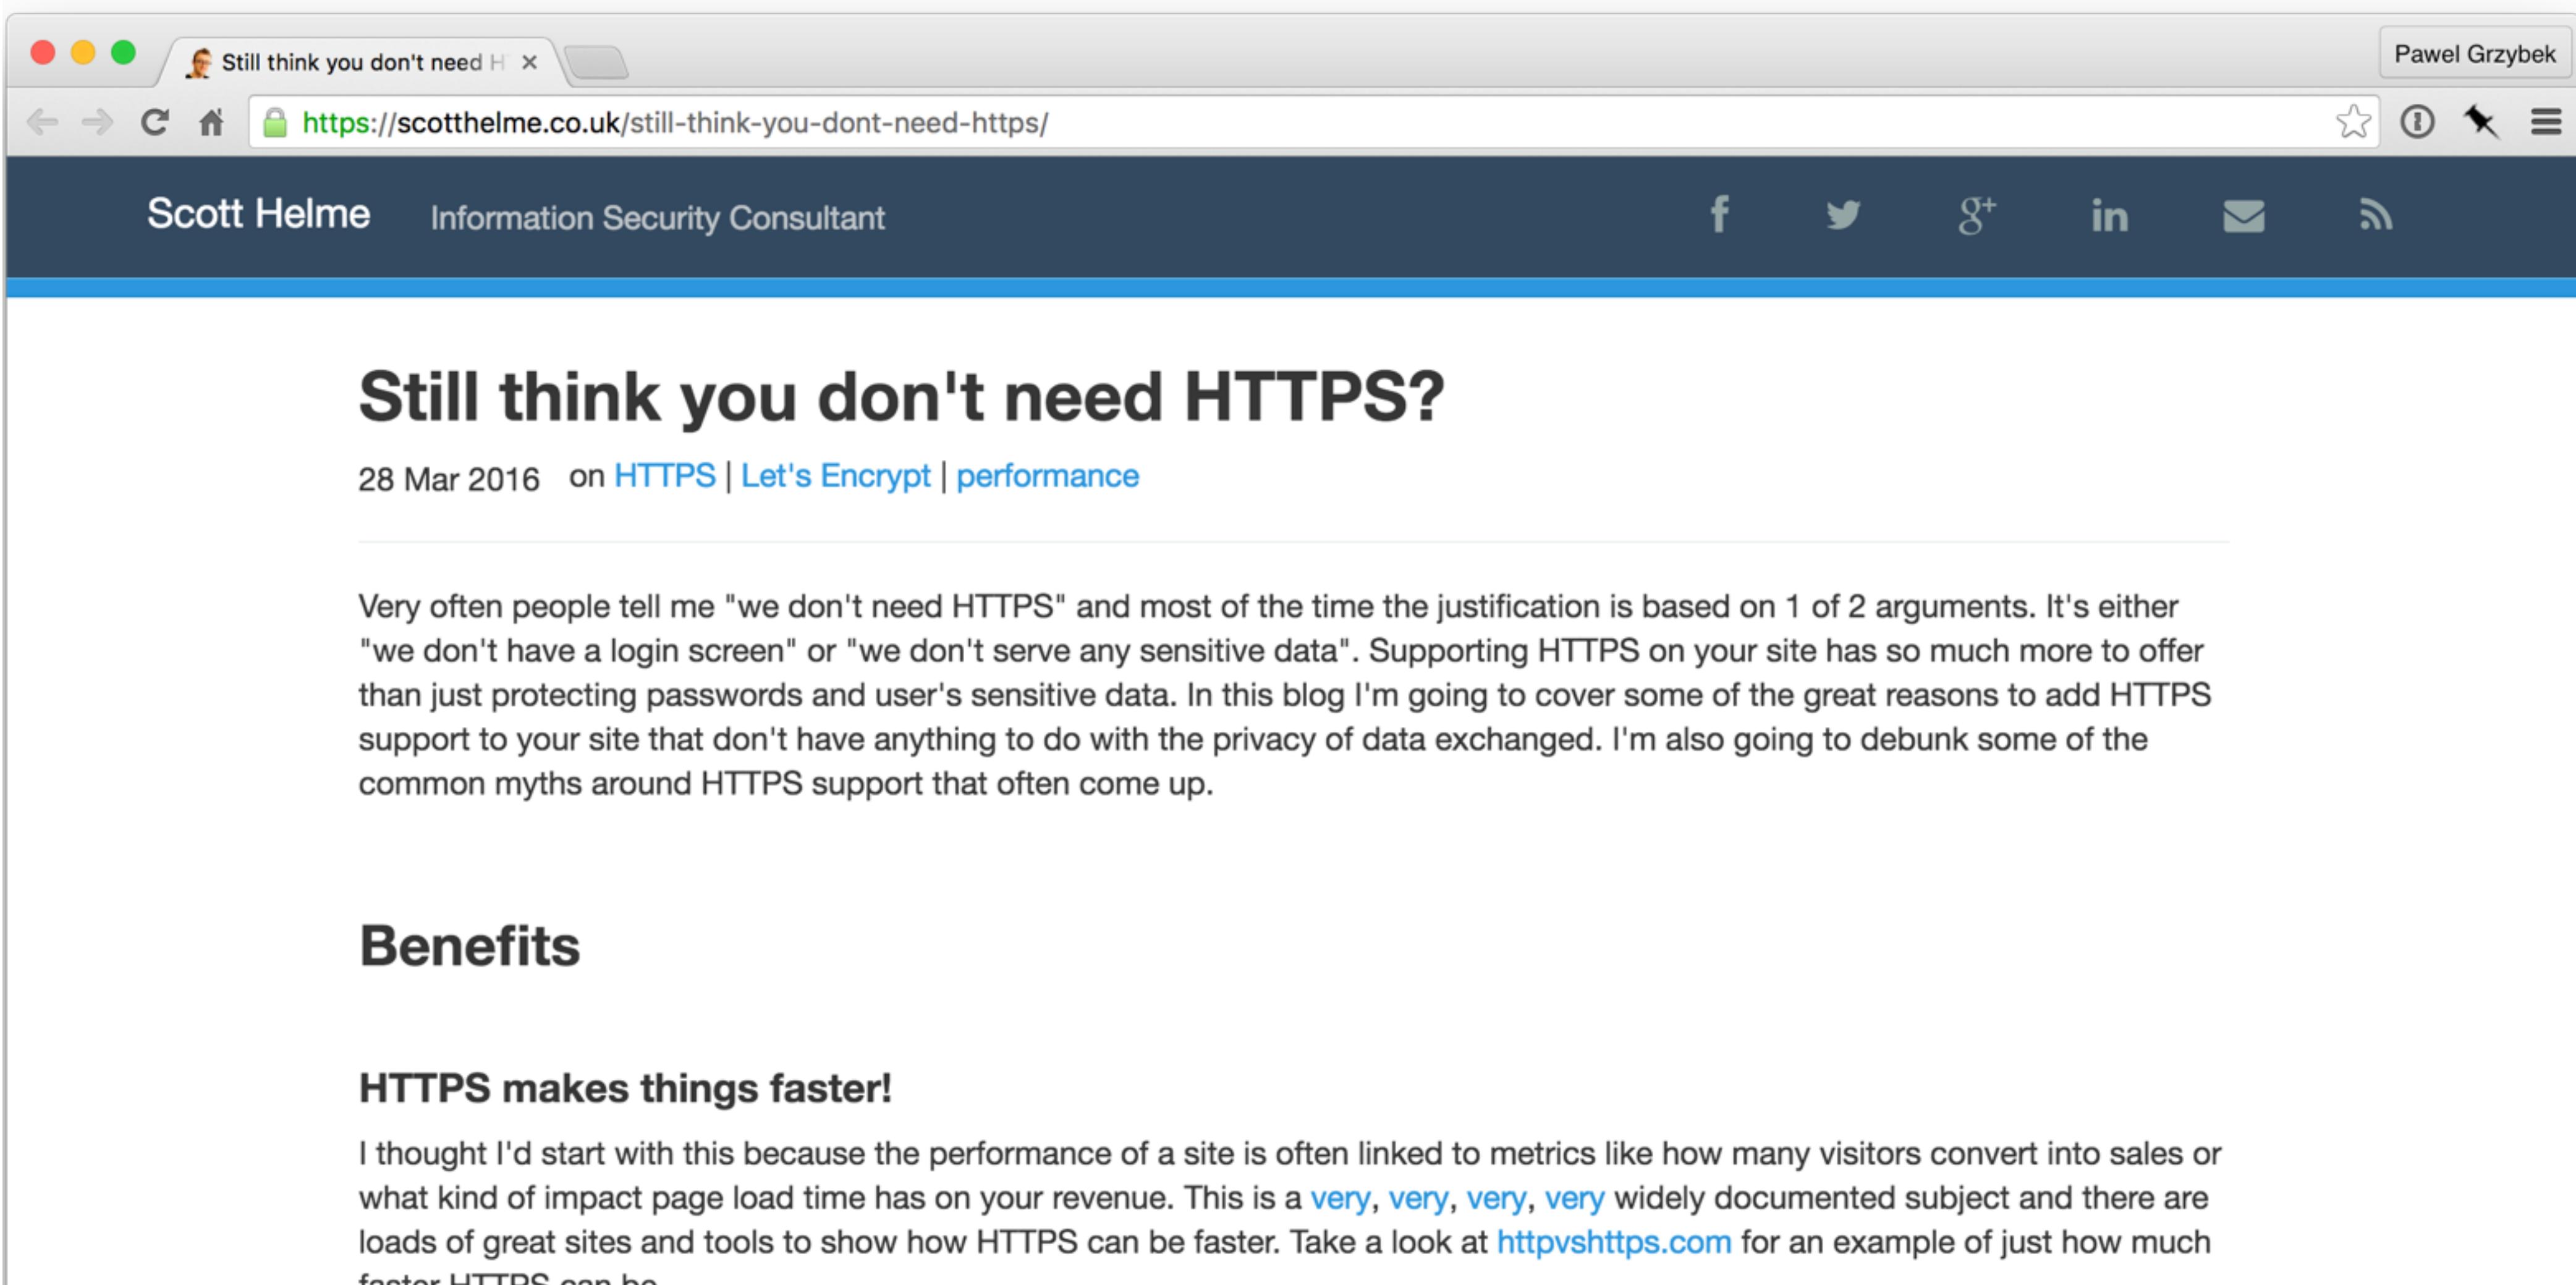

At the bottom of the sidebar are two buttons: "See More Jobs" and "Post a Job".

The visible text in the main content area is:

The following is a guest post by [David Clark](#). David is the creator of a thing called [Stylelint](#), a tool for keeping your CSS in shape. He does a great intro as to *why* you might

Still think you don't need HTTPS?

<https://scotthelme.co.uk/still-think-you-dont-need-https/>

The screenshot shows a web browser window with the following details:

- Title Bar:** Shows the title "Still think you don't need H" and a user profile picture for "Pawel Grzybek".
- Address Bar:** Displays the URL "https://scotthelme.co.uk/still-think-you-dont-need-https/" with a green lock icon indicating a secure connection.
- Header:** Features the author's name "Scott Helme" and title "Information Security Consultant" on the left, and social media sharing icons (Facebook, Twitter, Google+, LinkedIn, Email, RSS) on the right.
- Content Area:** The main article title is "Still think you don't need HTTPS?", followed by the date "28 Mar 2016" and categories "HTTPS | Let's Encrypt | performance".
- Text:** The first paragraph discusses common myths about HTTPS, such as "we don't have a login screen" or "we don't serve any sensitive data". It emphasizes that HTTPS offers more than just password protection.
- Section:** A heading titled "Benefits" is present, followed by a section titled "HTTPS makes things faster!".
- Text:** The "HTTPS makes things faster!" section explains how site performance is often linked to metrics like conversion rates and page load times, and encourages readers to look at httpvshttps.com for examples.

HTTPS makes things faster!
